

The Cancer Institute of New Jersey  
and Somerset Medical Center present

**Is Cancer In My Genes?**  
**A Program for Mothers and Daughters**

**Featuring Val Skinner,**  
six-time LPGA Tour champion and TV analyst

**Wednesday, May 19, 2010**  
**6 to 7 p.m.**

**Somerset Medical Center**  
**Steeplechase Cancer Center**  
**30 Rehill Ave., Somerville**

Does cancer run in your family? Are you concerned about your risk – or about passing along a gene to your loved ones? Learn more about the connection between genetics and cancer and how you can assess your risk.

Val Skinner will share her passion to create awareness about breast cancer among young women as the result of the loss of a dear friend and fellow LPGA player to breast cancer at the young age of 28. Skinner is the founder of LIFE (LPGA pros In the Fight to Eradicate breast cancer) and helped develop the LIFE Center at The Cancer Institute of New Jersey (CINJ).

Deborah Toppmeyer, MD, director of the LIFE Center and the Stacy Goldstein Breast Cancer Center at CINJ, and an expert in hereditary cancers, will discuss how your personal and family medical histories impact your risk for cancer and the LIFE Center's genetic counseling services now available at Somerset Medical Center's Steeplechase Cancer Center.

*Free. Light refreshments will be served. Pre-registration is required by calling 908-203-6234 or registering online at [www.somersetmedicalcenter.com/events](http://www.somersetmedicalcenter.com/events).*
