At the end of the session, participants should be able to:

- 1) More accurately diagnose and treat various types of cancer including: lung, breast, gastrointestinal and genitourinary.
- 2) Focus on the use of AJCC staging in clinical practice, which includes the use of appropriate prognostic indicators and evidence based national guidelines used in treatment planning.

This conference welcomes a distinguished faculty summarizing the latest data as of ASCO 2015. The variety of topics should be of interest to surgeons, medical and radiation oncologists and other medical professionals. Nurses and allied health professionals are also welcomed.
